Al Iman Schools

Colombo, Sri Lanka

**Educator** 

October 2020 - December 2020

Educator for computer science; Responsible for designing, implementing, and delivering custom tailored curriculums for key stages three, four, and five with emphasis on art of programming and integrating computer science in the domain of other subjects.

AsciiDoc CSS HTML JavaScript Python PyUnit

## British College of Applied Studies

Lecturer

Colombo, Sri Lanka July 2018 - July 2019

Instructor for *Pearson BTEC HND* in Computing; Responsible for level 5 specialist units: Computer Systems Architecture, Data Structures and Algorithms, Discrete Mathematics, Network Management, and Network Security.

C Firewalls IDS/IPS Systems JavaScript Python

**Exetel PTY Limited** 

Sydney, Australia Network Engineer October 2016 - February 2017

Govern, implement, and troubleshoot real-time traffic steering policies to ensure critical application delivery, value-added services, and user quality of experience driving profitability of key deliverables in the digital data & device space in terms of revenue, users, traffic across 30 Gb/s data link.

Firewalls IPv4 RADIUS Servers SNMP TCP/UPD VoIP

**IKON Systems (Private) Limited** 

Chief Information Officer

Colombo, Sri Lanka

January 2016 - October 2016

Direct and manage computing and information technology strategic plans, policies, programs, schedules, and responsible for advertising network's scalability, security, and capacity-planning.

AWS Systemd HAProxy

open source contributions

# Azure Resource Manager

Terraform Provider

Contributions include feature implementations and bug fixes on existing resource types and data sources.

## **Databricks**

Terraform Provider

Contributions include feature implementations and bug fixes on existing resource types and data sources.

research interests

Cybersecurity, digital forensics, botnets, computer science education, distance learning, collaborative learning, computer-assisted instruction

education

# Harvard College

Massachusetts, United States June 2017 - September 2021

Bachelor of Liberal Arts (A.L.B.)

Computer Science; GPA 3.9 (as of May 2018)

Related studies in linear algebra, statistics and probability, and finance.

## Stanford University

California, United States

October 2017 - November 2017

Studies in enterprise-level web application deployment with focus on security, reliability, scalability, and cross-browser support.

### Harvard University

Massachusetts, United States

MOOC

January 2015 - December 2015

Studies in computer science for real-world domains of biology, cryptography, finance, forensics, and gaming.

# Université Catholique de Louvain

Charleroi, Belgium

MOOC

January 2015 - November 2015

Studies in major programming concepts, techniques, and paradigms in a unified framework.

# The University of British Columbia

Vancouver, Canada

MOOC

January 2015 - October 2015

Studies in computation as a tool for systematic problem solving in non-computer-science disciplines.

### Lakeland Inter-American School

Pearson Edexcel AS Level

Colombo, Sri Lanka June 2014 - July 2015

## Lakeland Inter-American School

Pearson Edexcel Ordinary Level

Colombo, Sri Lanka March 2011 - June 2014

#### projects

## Singlife's BaaS provider reverse-engeering

- Associate technical lead for Railsbank replacement with in-house BaaS service
- Coarchitectured in-house replacement service to extactly replicate Railsbank functionalities
- Designed and authored the state machines for transaction execution interledger, manual credit, and manual debit transactions
- Designed and authored DBS outbound and inbound integration connectors to facilitate Fast and PayNow payments and ICN notifications

# Habitto Money GraphQL and REST backend

- Lead consultant for setting up initial backend monorepo and related pipelines
- Setup initial Nx monorepo, BitBucket OpenID runner authentication, and inital Terraform setup
- Later, consultant and lead developer for authoring fully automated self provisioning review environments using BitBucket CI/CD with multiple deployables
- Lead developer for authoring a seamless custom in-house replacement solution for Fivetran

#### Dealt Australia

- Lead architect for migrating existing customer-hosted Hyperledger Fabric to ImmuDB
- Automated all application deployments and configuration management using AWS CodeDeploy and BitBucket CI/CD
- Migrated all existing infrastructure to use IaC for management and provisioning and added enforcement checks to prevent manual infastructure manipulations
- Revamped virtual cloud networking to incorporate public, private, and NAT subnets and redesigned the microservice entrypoints and inter-service communication
- · Standardized logging, monitoring, and alerting

#### CaterCare Australia

- Lead consultant and developer for standardizing GitHub developer workflows
- Wrote a custom extensible GitHub Action to facilitate auto-labelling and auto-approving for a specific set of pull-requests obeying a predefined ruleset that require no reviews
- Set up branch/tag protection rules, code owners, secret scanning, and repo properties to standardize merging and pull-request approvals

#### honors and awards

#### HackerRank

Gold Honours - Problem Solving

Gold honours, five-star proficiency rating, in the domains of algorithms and data structures.

# HackerRank

Gold Honours - Python

Gold honours, five-star proficiency rating, in the domain of Python subsuming all language-supported paradigms.

## HackerRank

Gold Honours - SQL

Gold honours, five-star proficiency rating, in the domains of SQL subsuming all language-supported paradigms.
